

K-LOVE is an essential part of the community of San Antonio and surrounding area. It is a station that gives both uplifting news and music 24hrs a day. This is the main station that I listen to on the commute to and from work. It provides a calming influence throughout the day and night, and gives positive news and music.

If it were to be replaced by an LPFM station the community would suffer both by decreasing the joyous environment in the car and home, and allowing the negatives to pervade our lives without a source of light and comfort.

It is said that we are who we surround ourselves with, and if we take away a God centered point of reference, K-LOVE, we take away a whole community of goodness. There is enough darkness and negatives. Let's keep the positive available for the community.
